

IN THE SPECIFICATION

Page 6, beginning at line 6, please amend the paragraph as follows:

The pet toy 200 of Figure 2 may also be configured with a housing 110, as illustrated by way of example in Figures 1 and 3. In this configuration, the storage unit 250 may optionally include anywhere within, or throughout, an interior of the housing 110. For example, the attractant 230 could be loose within the housing or affixed to the housing by an adhesive, a staple or other fastener. The housing 110 and chassis 240 may be configured to be separable and reattachable by the user, to allow for replacement of the attractant. In one example a screw is used to attach the housing 110 to the chassis 240. It is also possible to provide the attractant on the outside of the housing.
